

# Skykomish Cleanup

## Construction update

July 14, 2010

### Recent activities

- Continued foundation work on the Community Center, Town Maintenance, and Ward buildings.
- Completed shallow metals digs in the west railyard area.
- Excavated a small area of the Thompson/Baggenstos backyard to chase contaminated soil. Samples came back clean and the area was backfilled and the landscaping was restored.
- Completed small dig on the southeast corner of the school property.

### What's happening next?

- Preparation work to raise the Mackner house and cottage will begin early next week. Nickels Brothers will be on site to raise the structures towards the end of the week and foundation work will follow. The work is expected to take three weeks.
- Crews will continue to dig test pits at the southeast corner of the school to determine the extent of contamination in this area.
- Continue work on building foundations in the Northwest Developed Zone (NWDZ). Crews are scheduled to set the Community Center and the Town Maintenance building on their foundations the week of July 26<sup>th</sup>.
- Continue restoration work on the Cascadia, including pouring the remaining footings and continuing framing work.
- In-river work near the bridge, Former Maloney Creek (FMC) East Wetland excavation, and FMC West Wetland excavation will occur during the fish window. Typically the fish window begins July 1, but due to high water flows and fish counts, the fish window has not yet opened. Final permits for in-river work are currently under review by the National Marine Fisheries Service and Washington State Department of Fish and Wildlife.
